## MINISTRY OF INDUSTRY RESOLUTION

New Delhi, the 19th August 1966

SUBJECT: Heavy Electrical Equipment—Constitution of a Coordinating Committee.

No. 25-59/66-HECHE.—Considerable capacity has now been established in the country, both in the public and private sectors, for the manufacture of heavy electrical equipment required for generation as well as transmission, as also capacity for manufacture of Power Boilers. Recent studies made by technical experts indicate that, by and large, the heavy electrical equipment which may be required for power projects all over the country during the next several years, can be secured from indigenous production in various public and private sector units. In the context of the prevailing foreign exchange situation, it is necessary to ensure maximum possible utilisation of this indigenous productive capacity and to minimise the import of electrical plant and equipment. For this purpose, it is essential to ensure close coordination between demand and supply of such equipment. Certain measures have already been taken by the Ministries for ascertaining the demands of power projects and for their placement on individual manufacturers of electrical plant and equipment. These steps have to be carried forward and the production programmes of the manufacturing units and their execution kept under continuous review, rendering to them such assistance as may be needed from time to time to reach optimum production and to make timely supplies of equipment to the power projects. With this object in view, it has been decided to set up a Committee consisting of—
